The week opened on a "bear" market all around. Gold, stocks and governments have declined in price more or less widely.

The stock market was feverish and excited from the start and underwent a steady decline until after the boards, when there was a raily of a half to one per cent, the market closing dull and heavy. This sudden transition from the recent buoyancy is only one of the periodical phases of the speculative cam-paign which was opened so brilliantly by the cliques last March. Two weeks ago we warned the public that these combinations were then beginning to unload, although they endeavored to cheat our advice of its effect by bidding prices up and throwing the illusion

although they endeavored to cheat our advice of its effect by bidding prices up and throwing the illusion of apparent buoyancy over their plans. Watching the movements of the cliques, we again warned the public last Monday as follows:—

But that the movement for realization has commenced in all the speculative shares, and is only temporarily delayed in order that it may be more effectually carried out for those which have not yet participated in it, is the impression conveyed to any one who studied impartially the situation on Saturday. The speculative combinations are generally harmonious when in distress. Like politicians, they quarred only when the spoils are at hand. In essaying the spring campaign for a rise in stocks they were very friendly in their relations to each other. Only one set of operators attacked them on the "bear" side, the onset being confined to the Northwest shares, but even they turned round with the general current and became "buils." Now that the cliques have succeeded in advancing prices ten to twenty per cent mutual distrust and fear pervade their councils. They are suspicious of each other and dread treachery in the temptation to make good the fruits of the campaign. Each clique is alraid of being left the last to self out. The Lake Shore party got out of the market very quiety. Then followed the Olino and Mississippi combination—the unloading in the latter stock being an instance in point of the fear of treachery—and realization has taken place in other shares, but not to so great an extent, the market having been too "soft" to receive large sales. The Central clique were afraid of ourside demoralization among the public and threw themselves into the breach when the "break" of Thursday occurred. The effect of the events of the week has been to render the market dull and to put all fresh operations rather on the "bearish" side of speculation.

Prices declined to-day because the cliques have realized, as we said, the rumors of a new Funding Prices declined to-day because the cliques have

realized, as we said, the rumors of a new Funding bill and of the probable immediate passage of the Currency Contraction bill which were amout in the street all day and assigned as the cause of the decline, are simply rumors which may or may not obtain some foundation before Congress adjourns. But there is nothing new concerning them at this writing. They were simply employed to-day to break prices. We notified the public when the Lake Shore clique sold out; we next recorded the operations of the Ohio and Mississippi party; we traced the decline in Reading to its source. The "break" in Rock Island to-day and in the general list is the sequence of the general unloading all around. The cliques have been two weeks unloading since we sounded the first note of warning to the public. They are out of their stocks. We will money market is so easy and "times so good" that a counter movement would be highly dangerous. The Lake Shore party sold out at 95 to 97. Yet the publie and the general buoyancy of the period carried the stock to 101%. The cliques are anxious to buy back, and they are naturally desirous of purchasing at the lowest prices. Hence they have converted the market into a "bear market," and by maintaining the application of that term to it for a week or more they hope to induce a decline of several percent even below the figures to which the market dropped to-day. Such is, in brief, the real situation of affars at the Stock Exchange. Prices are heavy, simply b cause the cliques have soid out and wish to buy back lower, The following were the closing prices of stocks at the last session of the Stock Exchange;—Canton, 66½ a 68; Camberland, 40 bld; Western Union, 32½ a 32¾; Quicksliver, 7½ a 9½; Ma-ri posa, 7½ a 8½; do., preferred, 13½ a 15; Pacine Mail, 36½ a 36½; Adams Express, 63½a 63½; Wells-Fargo Express, 14½ a 15; American Express, 43 a 44; United States Express, 44% a 45; New York Central consolidated, 100 a 100%; do. scrip, 95 a 95%; Harlem, 144 a 144%; Erie, 23% a 23%; Reading, 103% a 103%; Michigan Central, 124%; Lake Shore, 95% a 95%; Cleveland and Pittsburg, 106% bid; Chicago and Northwestern, 80% a 80%; do.

GOLD ACTIVE AND DECLINED. The gold market was assailed by the stock cliques in furtherance of the plan of breaking prices at the Stock Exchange, and some of the more timid holders who have been patiently awaiting the rise in gold predicted as a portion of the speculative campaign were induced to sell out at a loss, while the Funding bill and Currency bill rumors induced a new short interest. The purely speculative character of the decline is reflected in the inconsistency of such a course of the market in face of the strength of exchange, the prospective large shipments of specie this week and the decline in five-twenties in Europe to-day, three influences operating harmoniously to keep gold steady and firm. Just as there are the same reasons now why stocks should go up that existed a few weeks since, when the public were told by the cliques that the advance in the price of wheat at the West was to swell the receipts of the railways, so gold nominally should advance. But the precious metal, like the stock referred to, is in the hands of wealthy pools, who can raise or lower prices as suits their plans. Gold is to be the tool employed for breaking stocks. The brokers in the Stock Exchange kept their cyes intently fixed on the dial all day to-day. A decline of only a half per cent in gold led to a decline of only a half per cent in gold led to a decline of one to three per cent in stocks. How easy, then, to to three per cent in stocks. How easy, then, to control the greater movement with the smaller one. The course of the gold market is shown in the table:-

How Fartners in Business Are Obtained-An Alleged Swindle of Sixty-five Thousand Dollars.

Mr. Augustus W. Marsh, of No. 140 West Twentyseventh street, made the acquaintance, by introduction, of Mr. George W. Lockwood, of 122 Chamberstreet, about two years ago. Lockwood was in business at Nos. 9 and 11 White street, New York, as a hoop and corset maker. He represented to Marsh that if he had \$50,000 he could extend his business greatly, and consequently the profits also; that he had about \$60,000 worth of stock, and that he had also \$40,000 worth of collectable and good debis owing to him. Upon this and other representations Marsh was induced to loan him money and became a partner in August inst. He found that Lockwood was hop-lessly insolvent, and that his representations were made knowing them to be false. Lockwood very soon after the partnership got married, twed very expensively and finally absconded. He recently returned to this city and evidently was in the possession of abundant means. Affidavits setting forth the above facts were sworn to by Marsh, and upon the requisition of the District Attorney a warrant was issued for Lockwood's apprehension, who was brought before Justice Dowling yest-riday at the Tombs Police Cour, and committed without bail for examination, which was divel for Wednesday. hoop and corset maker. He represented to Marsh
